Obstacles to Returnee Reintegration in Iraq: Livelihoods and Economic Security

Key findings presentation: DSTWG (August 2022)

Overview of Presentation

- Research overview
- Key findings
- How to access report

Overview

- During the period of ISIL conflict (2014-2017), just **over 1 million IDP families** became displaced from their homes (16% of the country's total population)
- By mid 2022, just over 800,000 families (80%) have returned home
- In 2021-2022, IOM Research has developed a series of reports on the main reported barriers to returnee reintegration
 - Housing, land and property
 - Safety, security and social relations

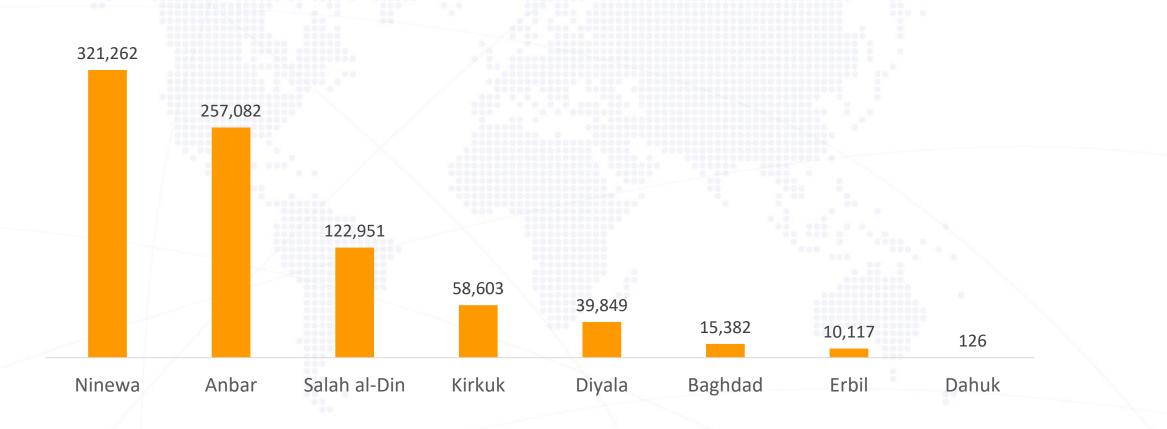

Research approach

- This new study is in line with the IDP reintegration framework of the Expert Group on Refugee and IDP Statistics (EGRIS)
- Analysis is based on two sub-criteria
 - 1. Livelihoods and employment refers to local economic activities
 - 2. Economic security refers to household revenue sources
- Data is mostly adopted from existing DTM sources collected in return locations:
 - 1. Return Index
 - 2. Integrated Location Assessment
 - 3. Master List
- Hotspots of key indicators are identified
- Comparative analysis between 2020 and 2021 is made

Returnee overview

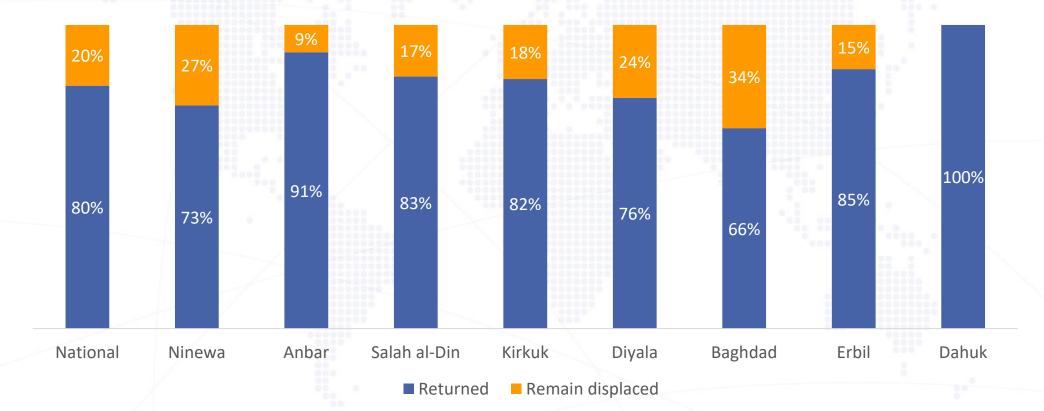

• By December 2021, the governorates of Ninewa, Anbar and Salah al-Din had received the highest number of returnee households.

Return rates

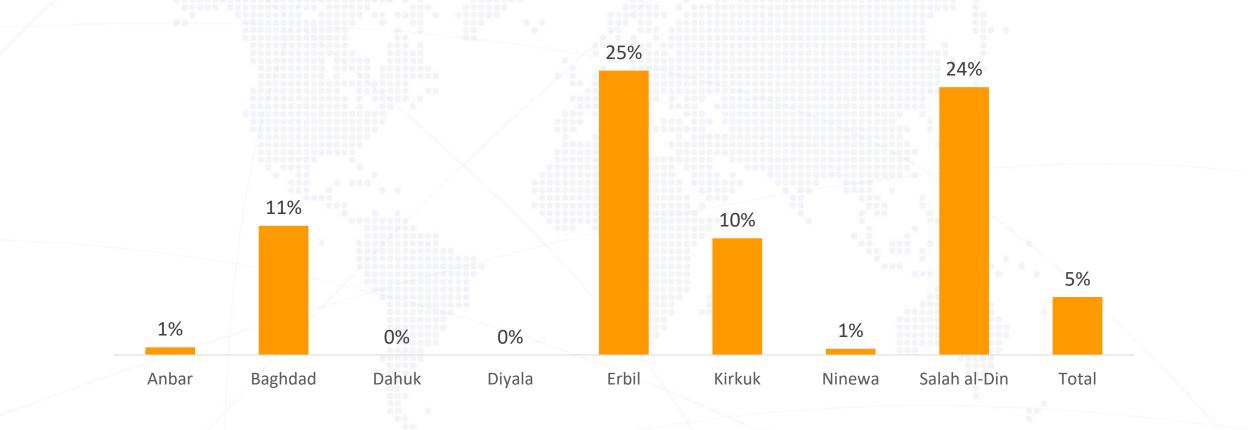

80% of all returnees have returned home, with return rates varying at governorate level – noting that only very small numbers displaced from Erbil and Dahuk.

Reasons for return

• **5% of returnees** report having returned to their area of origin due to the availability of **opportunities for livelihoods and employment**

Key findings

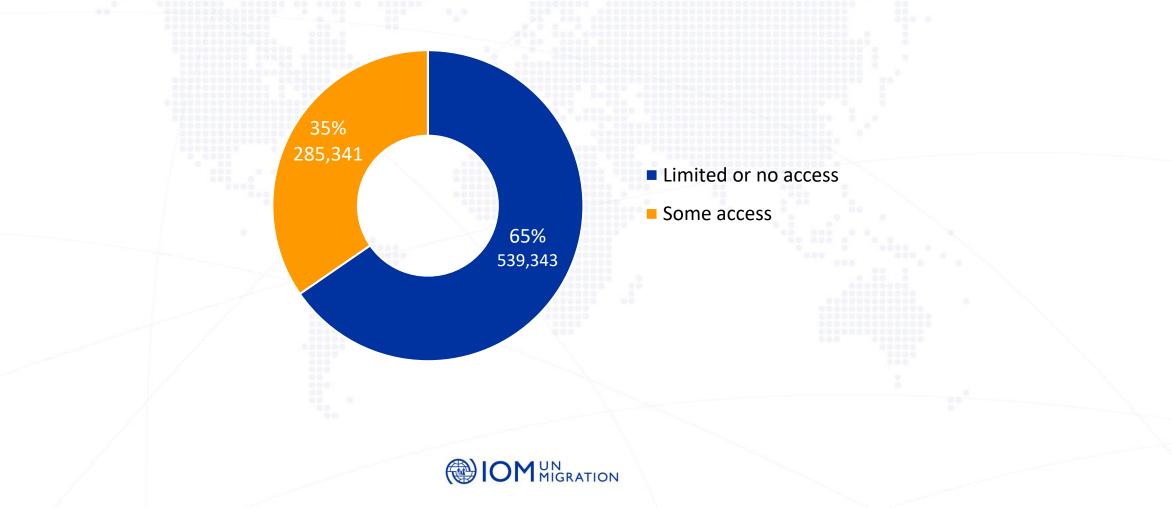

Criteria 1

Livelihoods and employment

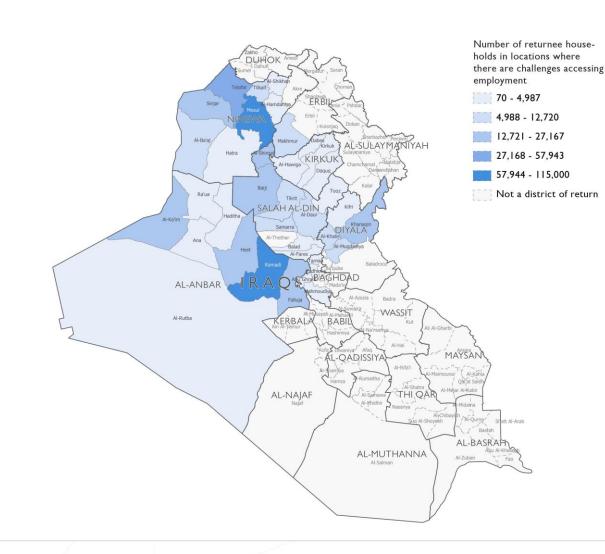

Limited employment opportunities

% of returnee households in locations with challenges to accessing employment

Limited employment opportunities

Returnee households in locations with limited employment opportunities

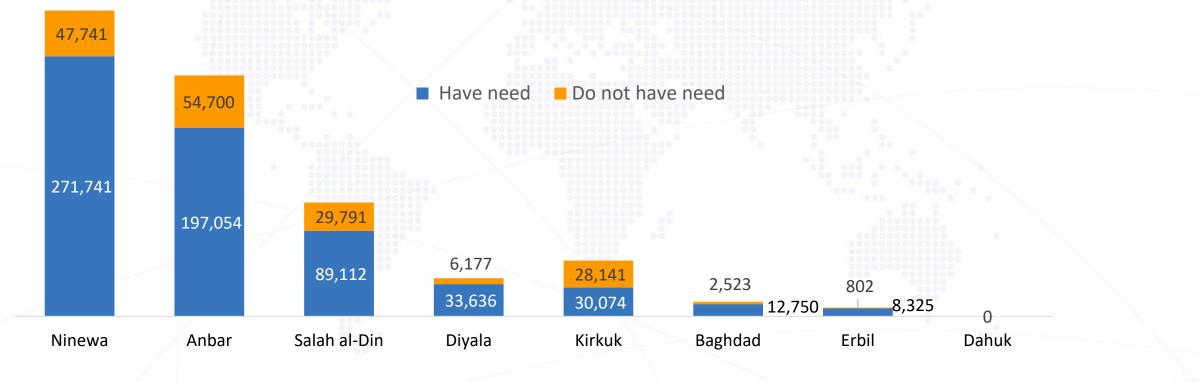

Hotspots
Mosul – 114,592 HHs
Ramadi – 96,370 HHs
Tel Afar – 57,943 HHs
Falluja – 43,236 HHs

Employment and livelihoods as a main need

• Access to employment/livelihoods is the **main need** of all returnees nationally (79%), followed by rehabilitation of infrastructure (49%)

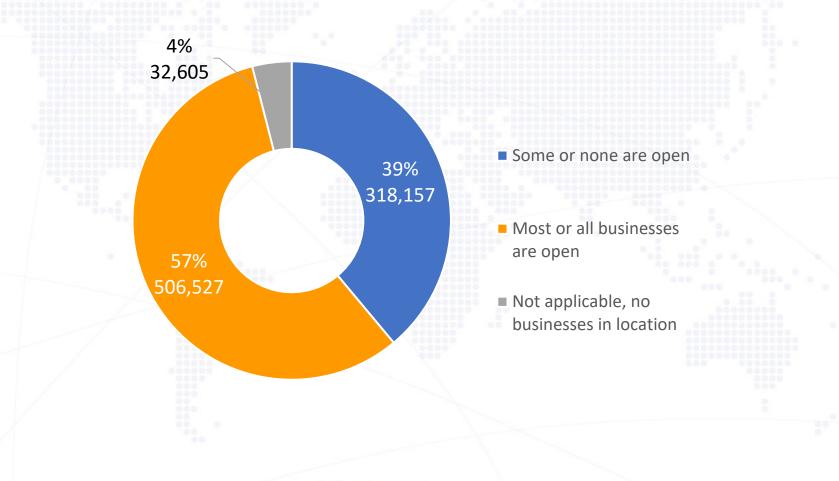

Number of returnee households in locations where access to employment/livelihoods is a main need

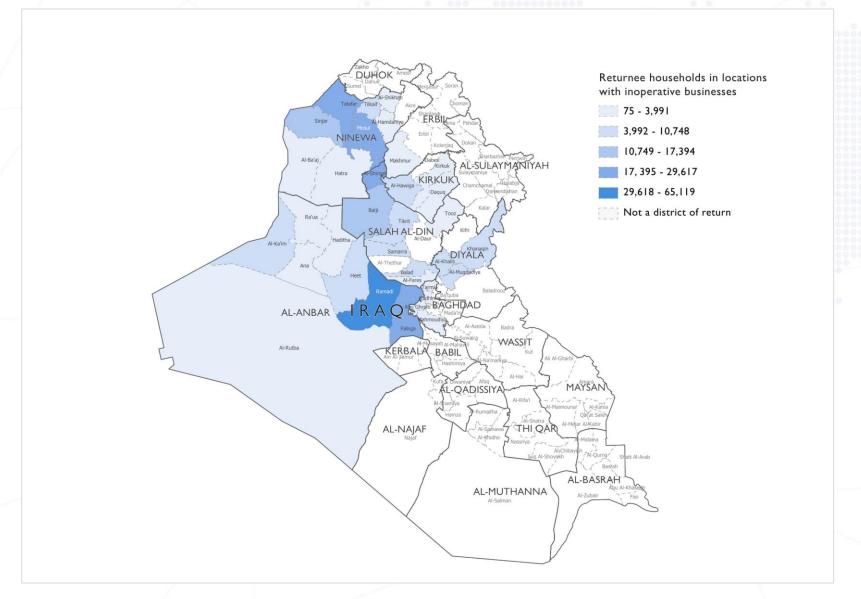

Inoperative businesses

Number of returnee households in locations with inoperative businesses

Inoperative businesses

Returnee households in locations with inoperative businesses

Hotspots

٠

Ramadi – 65,119 HHs

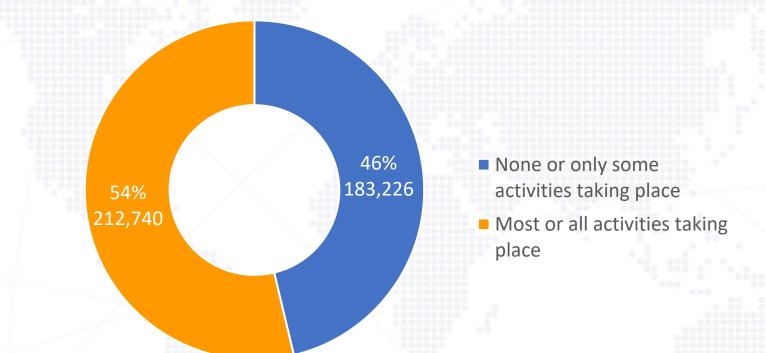

Mosul – 29,617 HHs

Falluja – 26,243 HHs

Telafar – 24,464 HHs

Inoperative agriculture

% returnee households in locations with inoperative agriculture (regional/rural areas only)

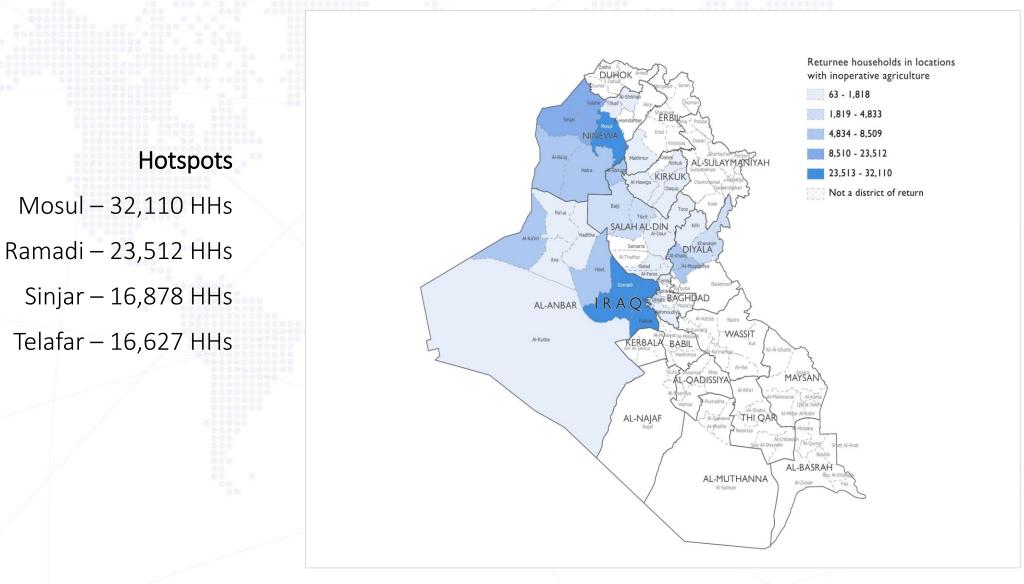

48% of return locations are in are agricultural areas, while 52% are not

Inoperative agriculture

Returnee households in locations with inoperative agriculture

Criteria 2

Economic security

Sources of income

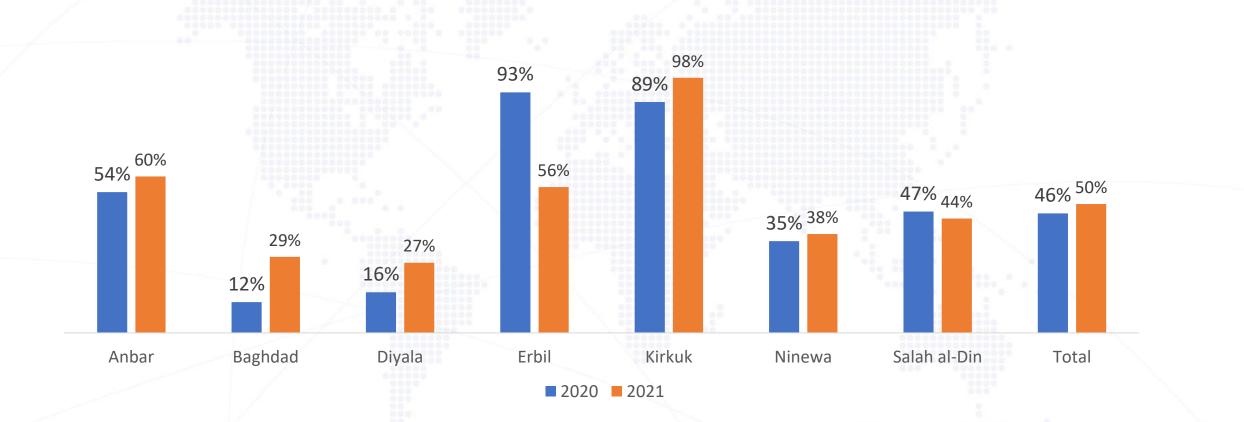

Returnee households by main sources of income in return locations, by governorate of return

	Anbar	Baghdad	Diyala	Erbil	Kirkuk	Ninewa	Salah al- Din	Total
Paid job (public)	86%	52%	64%	51%	70%	84%	84%	82%
Informal commerce or inconsistent daily labor	39%	44%	89%	79%	86%	72%	53%	61%
Pension	41%	0%	34%	64%	36%	50%	48%	44%
Paid job (private)	72%	31%	21%	26%	42%	18%	31%	39%
Agriculture / farming / herd animal raising	30%	83%	47%	38%	38%	40%	46%	39%
Business	26%	31%	19%	13%	24%	21%	24%	23%
Cash grants / aid aid from organisations or government	0%	7%	12%	0%	0%	4%	1%	3%
Savings	1%	3%	6%	2%	0%	2%	6%	2%
Money from family and/or friends	1%	0%	0%	3%	0%	4%	2%	2%
Rent received from house or land	0%	0%	0%	0%	0%	1%	4%	1%
Total	100%	100%	100%	100%	100%	100%	100%	100%

Economic activity

Returnee households in locations with high levels of economic activity, by governorate (2020 vs. 2021)
