

15 AUG - 15 OCT 2019

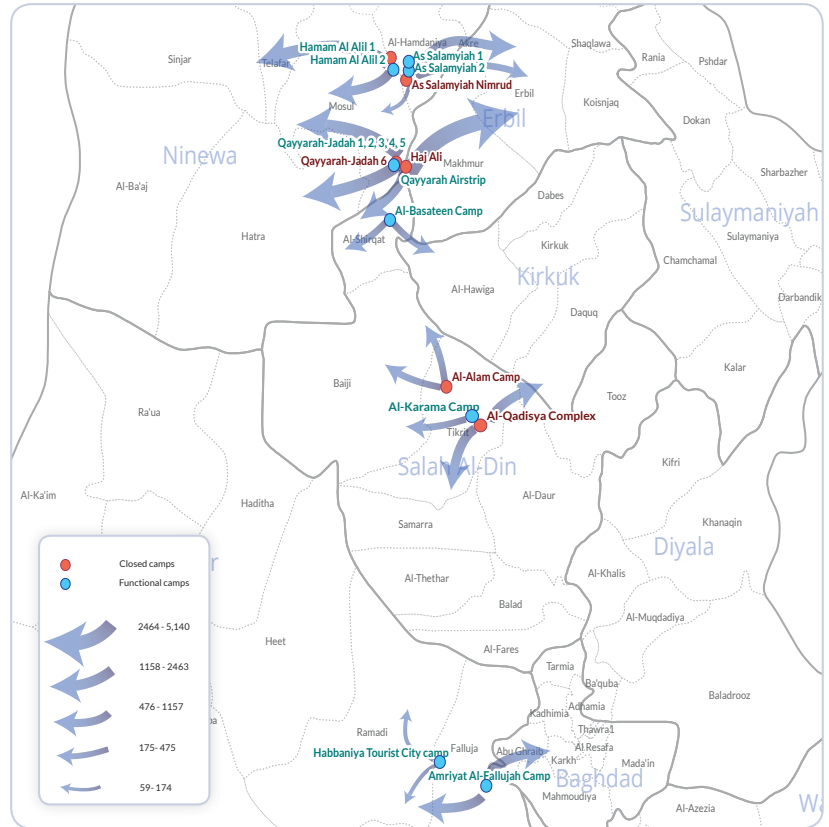

CAMP DEPARTURES

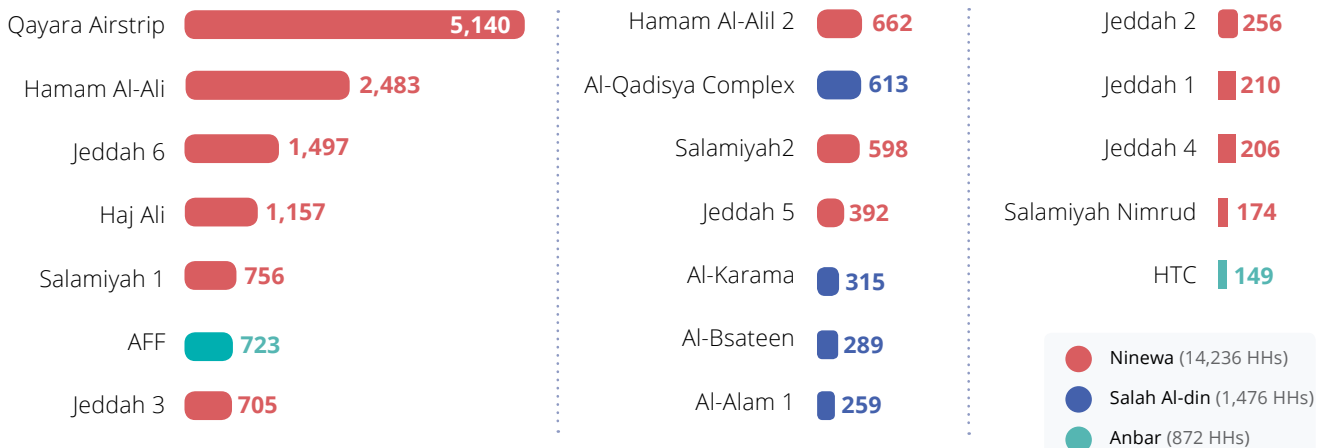

Between August 15 and October 15 2019, DTM tracked 16,584 households who left camps for non-camp settings.

These departures have occurred mainly in Ninewa and Salah Al-Din with a few in Anbar. As of now, most of the departures occurred from Airstrip, followed by Hamam Al-Alil 1, which is now closed, and Salamiyah 1 & 2 (when excluding other closed camps). The majority of households planned on returning or moving to the districts of Mosul, Baaj, Sinjar and Hatra.

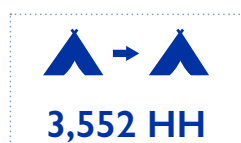

In Ninewa, as mentioned, Hamam Al-Alil 1 has been emptied and is being closed. Most of the households departed from the camp instead of opting to transfer to Hamam Al-Alil. Jeddah 6, Haj Ali and Nimrud camps are closed. Salamiyah camps 1 and 2 are being consolidated, and so are the Jeddah 1-5. In Salah Al-Din, Al-Qadisya and Al-Alam camps are also empty and officially closed.

NUMBER OF HOUSEHOLDS WHO LEFT CAMP SETTINGS PER CAMP

CAMP TO CAMP MOVEMENTS

During the reporting period, 3,552 households have moved between camps. Most of the movements have happened from camps that are being consolidated, most notably from Hamam Al-Alil 1 to 2, from Airstrip to the other Jeddahs.

ARRIVALS OF IDPs FROM CAMPS TO NON-CAMP SETTINGS

8,557 HH
ARRIVALS

A total of 8,557 households having displaced/returned to non-camp locations have been recorded in the same reporting period.

The district hosting the highest number of tracked camp IDPs is Hatra, followed closely by Baaj. Mosul and Sinjar also have received a high share of IDPs, while Telefar figures appear to stagnate. In addition to Ninewa, IDPs were also recorded in the governorates of Anbar, Erbil Salah Al-Din and Kirkuk. It is important to note that not all households who have been recorded in these non-camp settings have returned to their areas of origin, and many of the IDPs who left camps are now non-camp IDPs.
