DISPLACEMENT TRACKING MATRIX

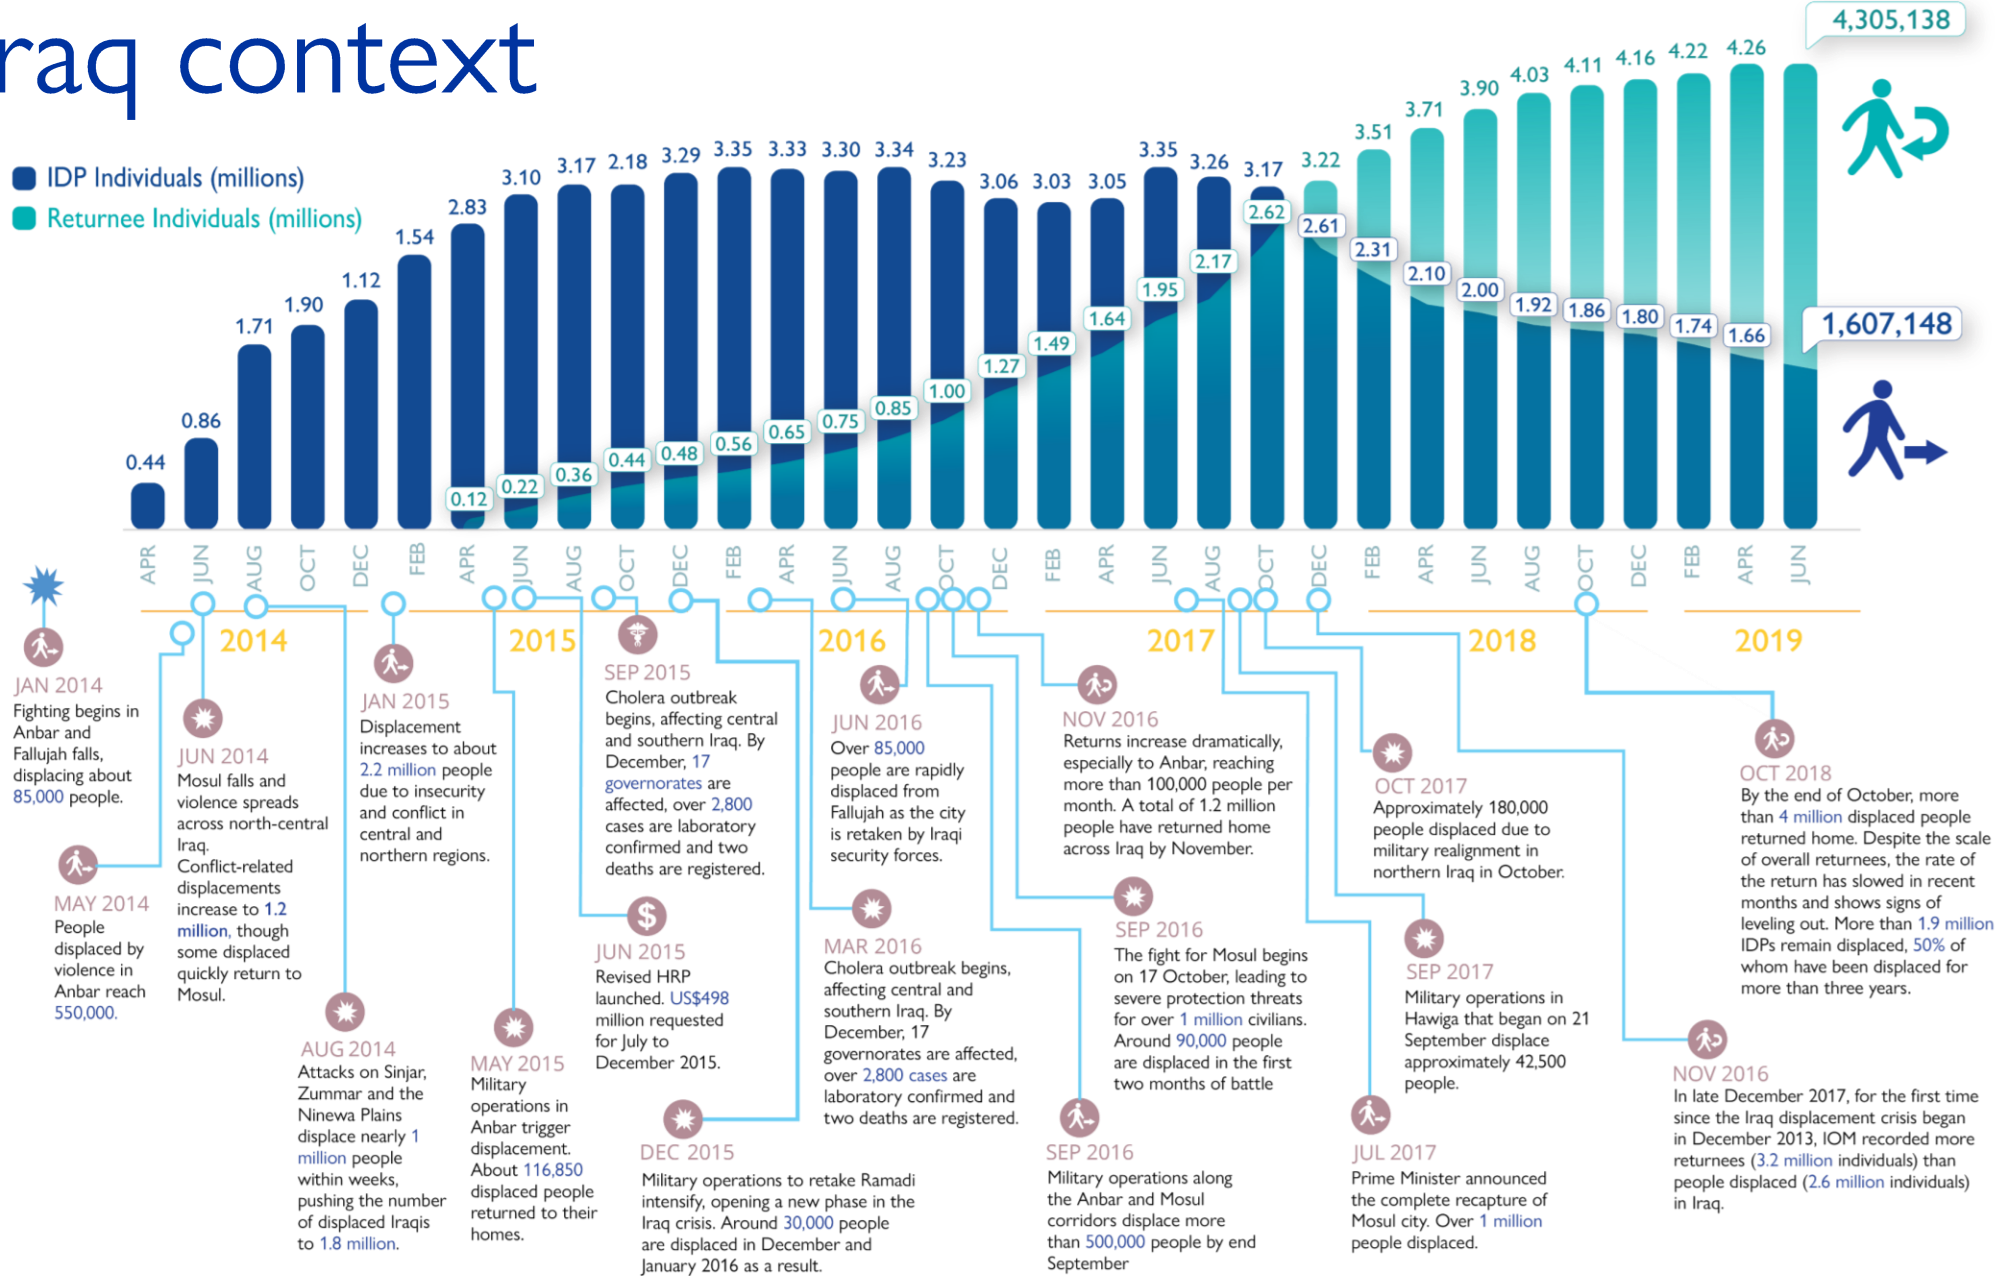

## DTM Induction

December 2019

# Iraq context

■ IDP Individuals (millions)  
■ Returnee Individuals (millions)

**2014**

- JAN 2014** Fighting begins in Anbar and Fallujah falls, displacing about 85,000 people.
- MAY 2014** People displaced by violence in Anbar reach 550,000.
- JUN 2014** Mosul falls and violence spreads across north-central Iraq. Conflict-related displacements increase to 1.2 million, though some displaced quickly return to Mosul.
- AUG 2014** Attacks on Sinjar, Zummar and the Ninewa Plains displace nearly 1 million people within weeks, pushing the number of displaced Iraqis to 1.8 million.

**2015**

- JAN 2015** Displacement increases to about 2.2 million people due to insecurity and conflict in central and northern regions.
- MAY 2015** Military operations in Anbar trigger displacement. About 116,850 displaced people returned to their homes.
- JUN 2015** Revised HRP launched. US\$498 million requested for July to December 2015.
- DEC 2015** Military operations to retake Ramadi intensify, opening a new phase in the Iraq crisis. Around 30,000 people are displaced in December and January 2016 as a result.

**2016**

- SEP 2015** Cholera outbreak begins, affecting central and southern Iraq. By December, 17 governorates are affected, over 2,800 cases are laboratory confirmed and two deaths are registered.
- MAR 2016** Cholera outbreak begins, affecting central and southern Iraq. By December, 17 governorates are affected, over 2,800 cases are laboratory confirmed and two deaths are registered.
- JUN 2016** Over 85,000 people are rapidly displaced from Fallujah as the city is retaken by Iraqi security forces.
- SEP 2016** Military operations along the Anbar and Mosul corridors displace more than 500,000 people by end September.

**2017**

- NOV 2016** Returns increase dramatically, especially to Anbar, reaching more than 100,000 people per month. A total of 1.2 million people have returned home across Iraq by November.
- SEP 2016** The fight for Mosul begins on 17 October, leading to severe protection threats for over 1 million civilians. Around 90,000 people are displaced in the first two months of battle.
- JUL 2017** Prime Minister announced the complete recapture of Mosul city. Over 1 million people displaced.
- SEP 2017** Military operations in Hawiga that began on 21 September displace approximately 42,500 people.

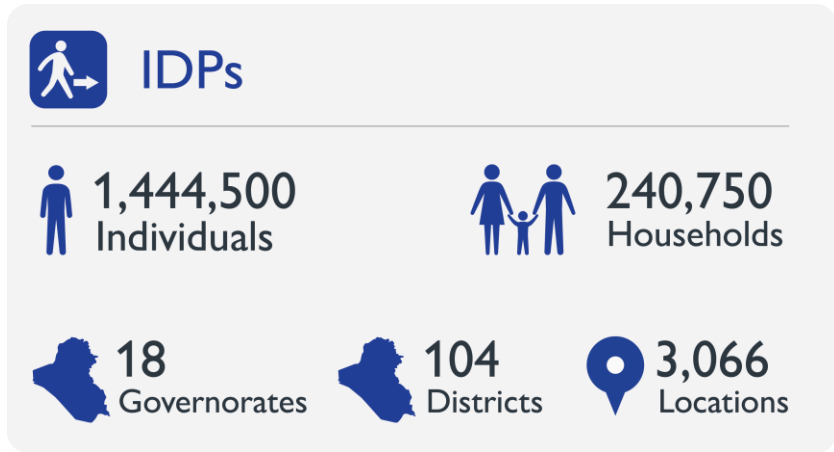

**2018**

- OCT 2017** Approximately 180,000 people displaced due to military realignment in northern Iraq in October.
- OCT 2018** By the end of October, more than 4 million displaced people returned home. Despite the scale of overall returnees, the rate of the return has slowed in recent months and shows signs of leveling out. More than 1.9 million IDPs remain displaced, 50% of whom have been displaced for more than three years.

# Iraq Displacement Trends

# Latest Displacement Data (Sept-Oct 2019)

# The DTM Unit in Iraq

# Where is DTM Iraq located?

- With regards to IOM
  - DTM is located under the Returns and Recovery Unit rather than the Emergency one, which is quite unusual but a reflection of the current situation
- With regards to the humanitarian coordination structure
  - Cluster system is activated in Iraq, DTM falls under a “cluster/sector”: the Coordination and Common Services (CCS)
    - Aim is to strengthen strategic and operational coordination at all levels, through common needs assessments; reliable data collection, processing, analysis, and reporting; mobilizing funding and tracking funding requirements; and facilitating access and a safe operational environment.
    - Other members are assessment (ex: REACH), security (ex: INSO), IDP call centre, NCCI, UNOPS, etc.

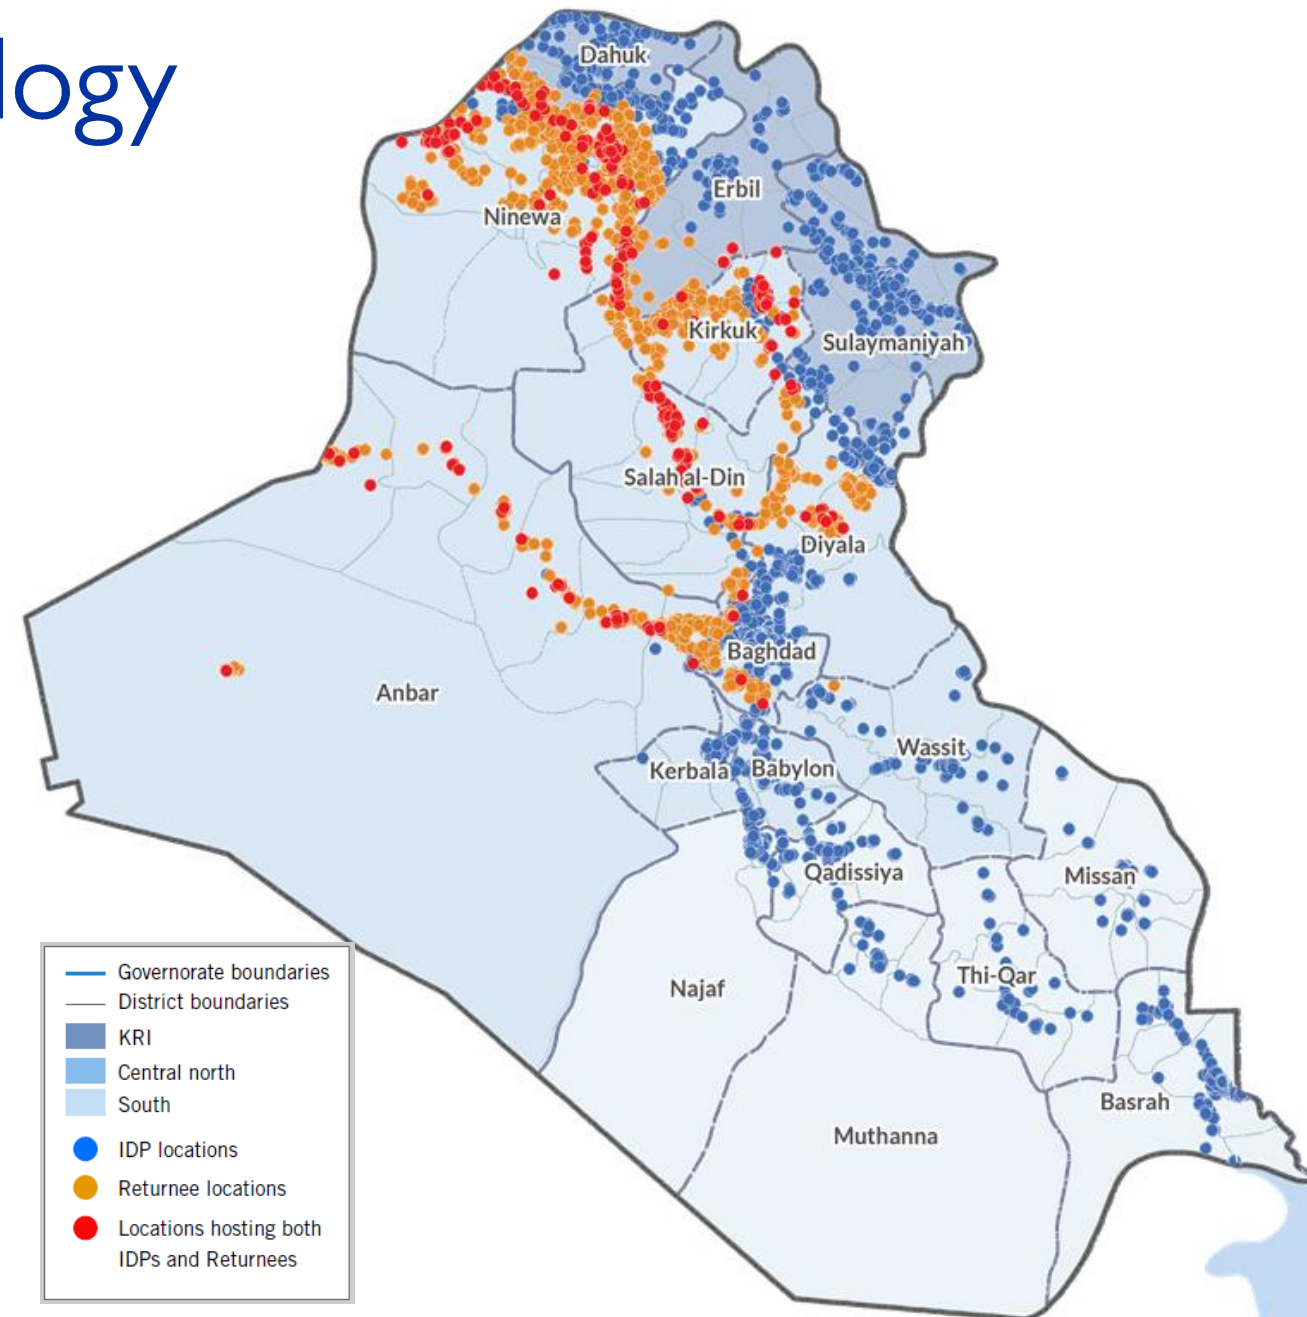

# Ongoing Activities

# Master List (i.e. Mobility Tracking)

# Master List: Methodology

- What?: Monitor displacement and provide accurate data about the IDP and returnee population in Iraq.
- How?: Data is collected at community-level across Iraq by IOM's Rapid Assessment and Response Teams (RARTs) through a well-established large network of over 9,500 key informants that includes community leaders, mukhtars, local authorities and security forces.
- When? Continuously since 2015 and currently reported bimonthly.

# Master List: Data collection

DISPLACEMENT TRACKING MATRIX  
**DTM ROUND 109**

IOM IRAQ • www.iraqdtm.iom.int • iraqdtm@iom.int

APR  
2019

## HIGHLIGHTS

Figure 1. Displacement over time  
This figure reports the number of IDPs and returnees since April 2014 and April 2015 respectively.

Data collection for round 109 took place during the months of March and April 2019. As of 30 April 2019, DTM identified 1,665,108 IDPs (277,518 families) dispersed across 18 governorates, 106 districts and 3,166 locations in Iraq. For the same period, DTM also identified 4,266,882 returnees (711,147 families) across 8 governorates, 38 districts and 1,651 locations. An additional 54,900 returnees were recorded during round 109, which is slightly higher than the increase in the previous round (46,662 returnees in round 108). Most returned to three governorates: Ninewa (19,110 individuals), Salah al-Din (18,750) and Anbar (9,264). The number of IDPs continued to decrease at a steady slow pace. During March and April, DTM recorded a decrease of 79,872 IDPs with the top three governorates being Ninewa (-45,360, -8%), Salah al-Din (-11,238, -9%) and Baghdad (-5,418, -8%).

In round 109, DTM split the long-term rental accommodation into two shelter categories for IDPs: fit and unfit for habitation. Those shelters that were deemed unfit for habitation, or uninhabitable, were categorized as critical shelters.

In terms of the districts of origin, IDPs come from 47 districts across eight governorates: Anbar (8 districts), Babylon (3 districts), Baghdad (8 districts),

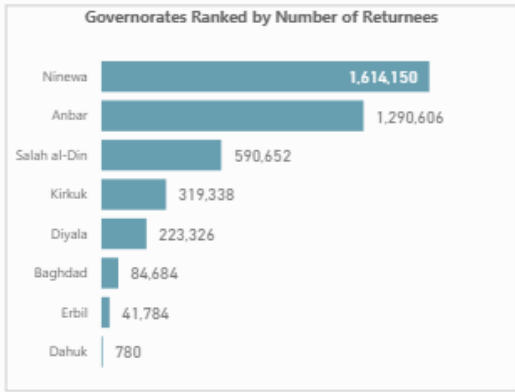

Diyala (6 districts), Erbil (1 district), Kirkuk (4 districts), Ninewa (8 districts) and Salah al-Din (9 districts). However, 53 per cent come from only four districts in Ninewa: Mosul (316,824 individuals, 20%), Sinjar (296,358, 18%), Telafar (129,096, 8%) and Al-Balaj (115,074, 7%).

In April, DTM published the [Return Index Report Round 3](#) and two studies on the state of Protracted Displacement, analysing both the main districts of origin and displacement. [Return Index Report Round 3](#) indicates that, of the assessed returnee population, 11 per cent (472,350 individuals) are living in high severity conditions across 279 locations. This proportion is relatively similar to the previous rounds published in September and January 2019, which had respectively 11 per cent and 10 per cent of returnees falling in this category. The study on the state of Protracted Displacement reveals that 61 per cent of IDPs are currently considered to be in protracted displacement, meaning they have been displaced for over three years, and nearly all of them are at risk of long-term displacement. As the study shows, IDPs are not (or only very slowly) moving out of their districts of displacement (less than 15% since May 2018) and nearly all planned on staying in displacement for at least the next 12 months.

# Master List: Dashboard

All data presented here is extracted from the latest DTM master lists (see date above) and shows cumulative population figures at individual level since January 2014 (unless specified otherwise).

Return Rate Since 2014: **70%**  
Return Rate Since Last Month: **1.8%**

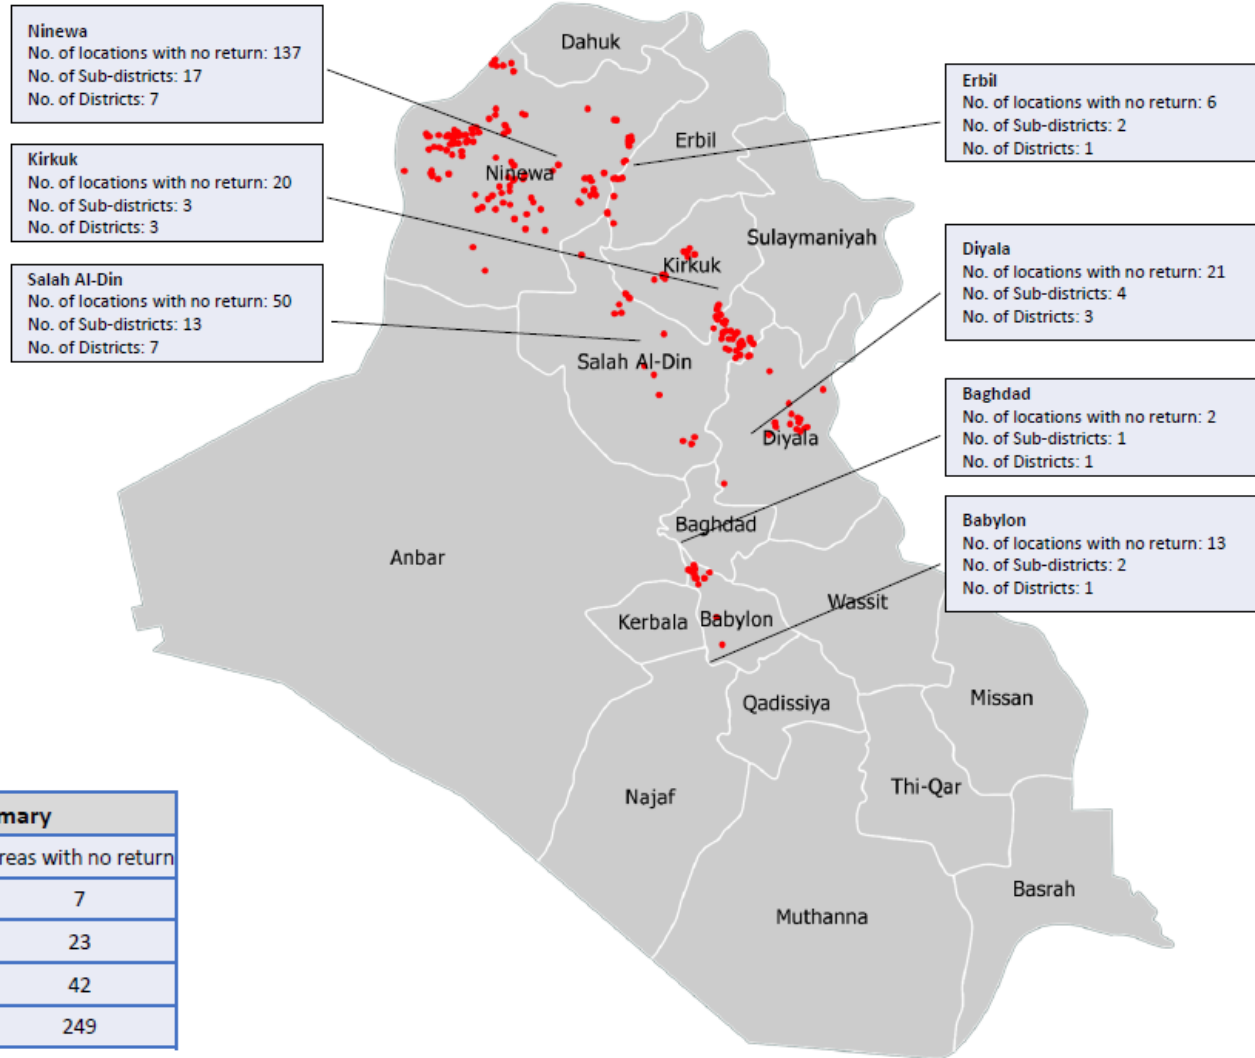

### Return Rate by Governorate of Origin

Governorate of Origin	Total Displaced Population	Still Displaced	Returnees	Return Rate(%)
Dahuk	780	0	780	100
Anbar	1,492,602	201,996	1,290,606	86
Kirkuk	430,470	111,132	319,338	74
Baghdad	114,714	30,030	84,684	74
Diyala	311,196	87,870	223,326	72
Salah al-Din	829,380	238,728	590,652	71
Erbil	61,386	19,602	41,784	68
Ninewa	2,688,144	1,073,994	1,614,150	60
Babylon	39,480	39,480	0	0
<b>Total</b>	<b>5,968,152</b>	<b>1,802,832</b>	<b>4,165,320</b>	<b>70</b>

### Change in Return Figures Compared with the Last Month

Governorate of Origin	Returnees	Returnees Last Month	Change	Change (%)
Erbil	41,784	40,374	1,410	3.5 %
Salah al-Din	590,652	571,674	18,978	3.3 %
Kirkuk	319,338	310,608	8,730	2.8 %
Baghdad	84,684	82,734	1,950	2.4 %
Ninewa	1,614,150	1,581,462	32,688	2.1 %
Anbar	1,290,606	1,280,268	10,338	0.8 %
Diyala	223,326	222,342	984	0.4 %
Dahuk	780	780	0	0.0 %
<b>Total</b>	<b>4,165,320</b>	<b>4,090,242</b>	<b>75,078</b>	<b>1.8 %</b>

# Locations of No Return

- DTM identified 249 locations of no return across 7 of the 8 governorates of origin
- The majority of confirmed locations were found in Ninewa and Salah al-Din
- Main reasons listed for non return were blocked areas and security issues

Summary	
	Areas with no return
<b>Governorates</b>	7
<b>Districts</b>	23
<b>Sub-Districts</b>	42
<b>Locations</b>	249

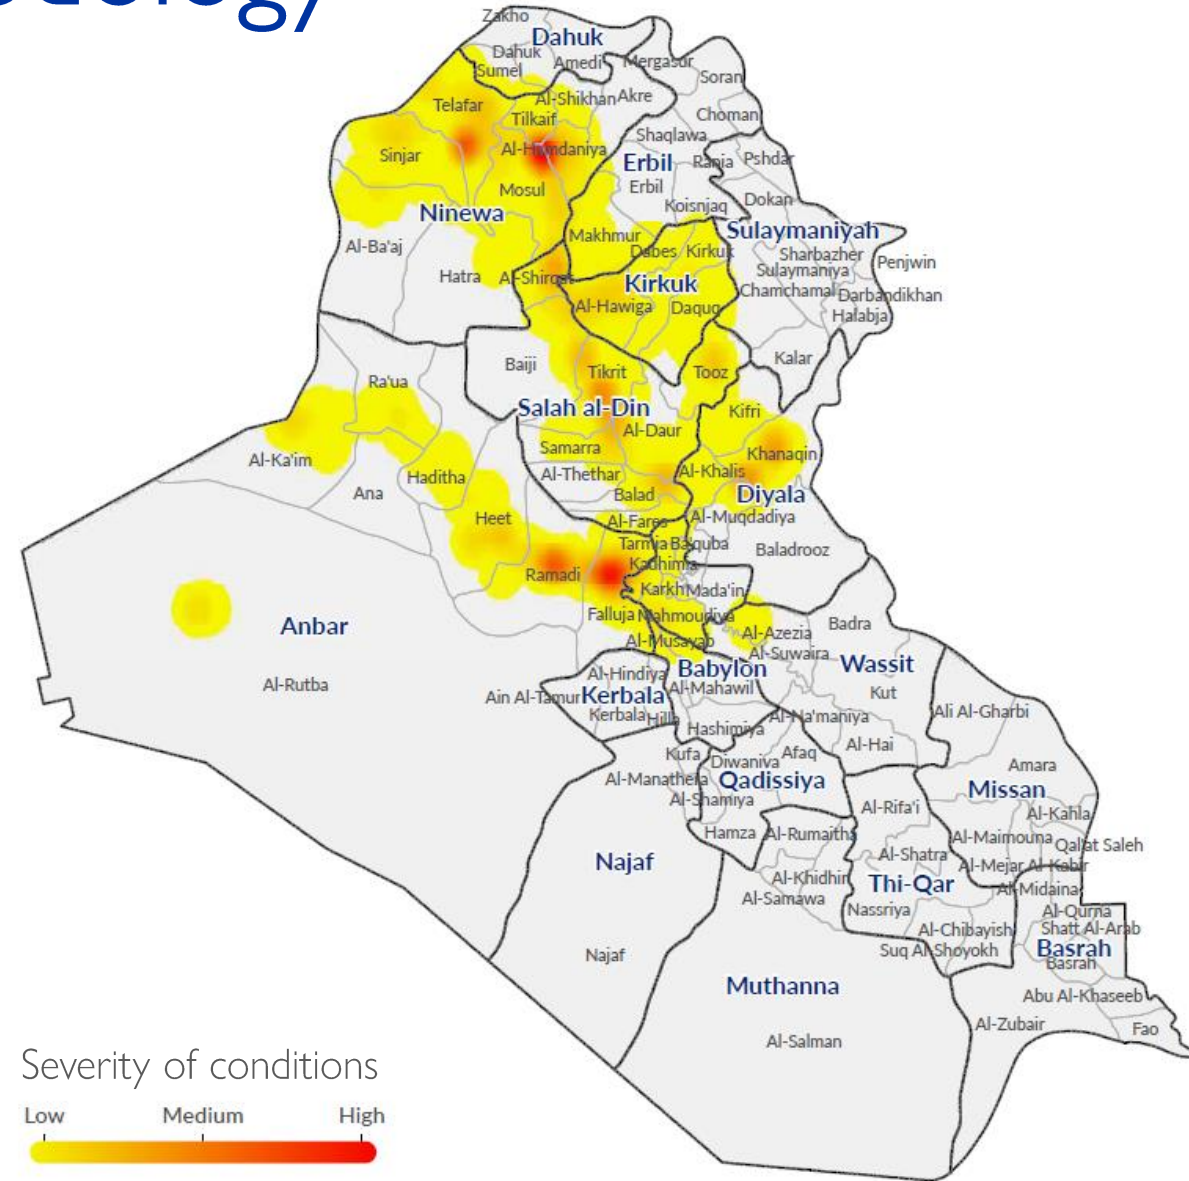

\* A total of 3 new locations were assessed in this round, which were not previously accessible.  
 \* Last Update July 2019

# Return Index

# The Return Index: Methodology

- The RI tool is designed to measure the severity of conditions in locations of return.
- It is built on a list of indicators developed in consultation with relevant partners and stakeholders to reflect the displacement context in Iraq
- The overall index goes from 0 (all essential conditions for return are met) to 100 (no essential conditions for return are met). Higher scores denote more severe living conditions
- The scores of the severity index are grouped into three categories: 'low', 'medium', and 'high' (which also includes 'very high')
- Data is collected bimonthly through RARTs and key informant interviews.

8 governorates	38 districts	701,789 families	1,564 locations
-------------------	-----------------	---------------------	--------------------

# The Return Index: Indicators

- The Return Index is based on 16 indicators grouped into two scales

## Scale 1: Livelihoods and basic services

- Residential destruction
- Employment access
- Water sufficiency
- Recovery of agriculture
- Electricity sufficiency
- Recovery of businesses
- Access to basic services
- Reincorporation of government employees

## Scale 2: Social cohesion and safety perceptions

- Community reconciliation
- Multiple security actors
- Blocked returns
- Checkpoints controlled by other security actors
- Daily public life
- Illegal occupation of private residences
- Mines
- Sources of violence

Scale 1: Livelihoods and basic services

Scale 2: Social cohesion and safety perceptions

# The Return Index: Overall Severity

Number of returnees and locations per governorate by category of severity

Governorate	High	Medium	Low	# of individuals
Anbar	84,174	503,718	710,244	1,298,136
Baghdad	11,136	32,412	43,398	86,946
Dahuk	0	0	780	780
Diyala	52,644	131,304	39,684	223,632
Erbil	0	6,108	34,962	41,070
Kirkuk	3,780	124,416	193,662	321,858
Ninewa	177,408	462,306	983,370	1,623,084
Salah al-Din	185,502	359,718	70,008	615,228
# of individuals	514,644	1,619,982	2,076,108	4,210,734

# The Return Index: Hotspots

- Using a combination of score severity on at least one of the scales and the number of families living in the area, 32 hotspots were identified across six governorates.

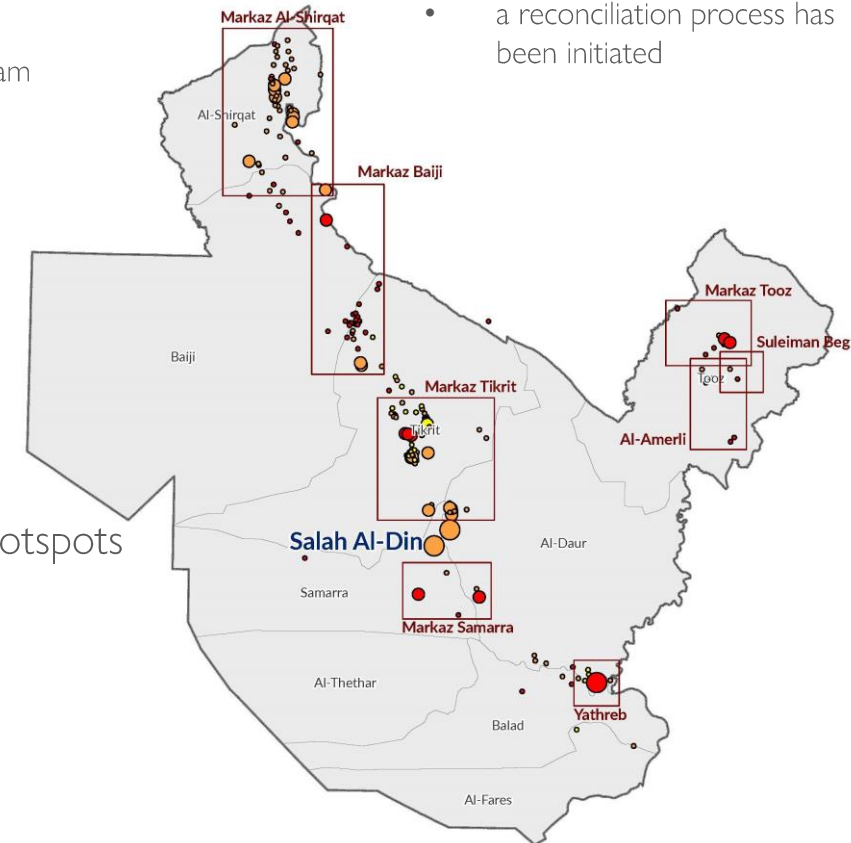

NINEWA	SALAH AL-DIN	ANBAR	DIYALA	KIRKUK	BAGHDAD
Markaz Sinjar	Yathreb	Al-Rummaneh	Markaz Al-Muqdadiya	Al-Riyad	Al-Nasir Walsalam
Qaeyrrawan	Markaz Tooz	Markaz Al-Ka'im	Jalula	Al-Abassy	Al-Latifya
Al-Shamal	Al-Amerli	Markaz Al-Rutba	As-Saadiya		Meshahda
Markaz Telfar	Suleiman Beg	Al-Saqlawiyah			
Ayadiya	Markaz Baiji	Al-Garma			
Zummar	Markaz Samarra				
Hamam al-Aleel	Markaz Al-Shirqat				
Al-Shura	Markaz Tikrit				
Al-Qahtaniya					
Markaz Al-Ba'aj					
Markaz Hatra					

Improvement in Markaz Baiji:

- employment opportunities
- housing reconstruction
- tribal tensions

Positive changes in Yathreb:

- a reconciliation process has been initiated

Example: Salah al-Din Hotspots

Severity			Number of Returnees
High	Medium	Low	
<span style="color:red">●</span>	<span style="color:orange">●</span>	<span style="color:yellow">●</span>	1 - 815
<span style="color:red">●</span>	<span style="color:orange">●</span>	<span style="color:yellow">●</span>	816 - 2,514
<span style="color:red">●</span>	<span style="color:orange">●</span>	<span style="color:yellow">●</span>	2,515 - 7,188

# Integrated Location Assessment

# ILA: Methodology

- The Location Assessment collects detailed information on IDP and returnee families living in locations identified through the Master Lists, plus info about stayees and returnees from abroad
- The unit of reference of this assessment is the location; # assessed locations in ILA IV is 3,645 with less than 5 HHs
- Data is collected once a year through RARTs and key informant interviews.
- Combined with MCNA to inform HN

# ILA: Dashboard

## Integrated Location Assessment - ILA IV

Data collection: May-June 2019

The interactive dashboards below show data for all assessed locations and can be filtered by governorate, district or both. A summary dataset of each location can be viewed by clicking on the link under the "Location Assessment" column in the below table.

**Governorate** 
**District**

Location Name

 **3,645** Assessed Locations
  **171,699** IDP Families
  **712,022** Returnee Families

The darker colours point to a larger number of locations, while the brighter colours indicate a lower number of locations

# HNO Indicators

Cluster /Sector/Sub-cluster	Indicator
EDC	% locations with a functional primary and secondary school, or within 5km distance away
EDC	% locations (with access to functional schools) who reported sufficient certified teachers
EDC	% locations where most children (aged 6-12) are attending formal education
EDC	% locations where most children (aged 13-17) are attending formal education
FSC	% locations where most IDP/returnee households do not have sufficient access to food
FSC, CWG	% locations with a functional market/shop providing basic items and food, or within 5km distance away
Health	% locations with a functional health clinic, or within 5km distance away
Health	% locations with a functional hospital, or within 10km distance away
Health	% HH with access to a functional health clinic within 5km
Protection	% HHs experiencing daytime movement restrictions
Protection	% of locations where people experience daytime movement restrictions within the governorate
HLP, SNFI	% locations where IDP HHs have been reportedly evicted (either sent back forcibly to their area of origin, or forced to relocate within location of displacement)
MA	% of locations where mines or UXOs are reported to be present
SNFI	% of IDPs/returnees by shelter type
SNFI	% locations where more than half of shelters reported to be damaged or in need of repair
SNFI	% locations where households are without access to electricity
WASH	% locations where households do not have enough water for their needs
WASH	% locations where the primary source of drinking water is acceptable in terms of colour, taste, and smell
WASH	% locations where households do not have access to private or communal latrines
WASH	% of locations without access to waste collection or communal garbage bins

# Protracted Displacement

# Main Obstacles to Return

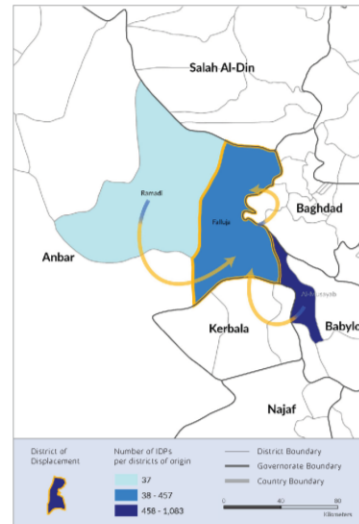

# District-level factsheets

## FALLUJA DISTRICT, ANBAR

Out-of-Camp IDPs in Falluja District

### IDP DISTRICTS OF ORIGIN

### IDP MOVEMENT

Falluja is a “stationary” district. Only 5% of IDPs have left the location of displacement since May 2018 and these movements are mainly intra-district. Most of IDPs in Falluja are from Babylon and nearly all IDPs in the district are in protracted displacement. Their movements are therefore related to the military operations in Babylon in October 2014 and the main cities in Anbar up until the spring of 2016 – including secondary movements of IDPs.

### IDP INTENTIONS

Short/Medium Term (less than 12 months)

Long Term (more than 12 months)

### DISTRICT IDP POPULATION

### RATE OF CHANGE IN IDP POPULATION

### IDP DISTRICTS OF ORIGIN

### IDP LENGTH OF DISPLACEMENT

### IDP ETHNO-RELIGIOUS COMPOSITION

### VULNERABILITIES

### OBSTACLES TO RETURN

According to key informants, returns of Al-Musayab IDPs are still not permitted due to tribal and political issues related to the population composition of the area. Returns to around 70% of locations in Falluja and around 50% of those in Ramadi are also obstructed by security forces, and families are prevented from returning due to perceived affiliation to extremist groups. When directly assessed, families reported home destruction/damage (57%), Discrimination (38%) and fear/trauma (31%) as reasons not to return.

#### Key Obstacles to Return

Social Cohesion	Mental Health
House Destruction	Security
Livelihoods and Services	

Figure 1. Key Obstacles to Return

### CONDITIONS IN DISPLACEMENT

Households who remain in Falluja appear to be particularly vulnerable. These families have one of the lowest monthly median income of all districts: IQD 5,278 (76% of HHs reported a monthly family income per capita below 20,000 IQD) and key informants report that nearly all families lack the funds necessary to return. Obstacles to work were reported by half of families; only 44% currently receive income through employment, 62% are taking on loans and debts and only 8% can still rely on savings. Around one third are supported by families/friends, 13% by NGOs/charities and 7% by social services. Regarding housing, 79% are settled in critical shelters (according to MCNA, mostly tents) and 21% are hosted by other families. Other coping strategies used by some IDPs are selling assistance that they have received (4%) and/or household assets (2%).

These households also exhibit many other vulnerabilities: one in four is headed by a female and the same share has at least one member with disabilities. Nearly all (79%) are missing HLP documentation and 16% do not have civil documentation. In addition, 21% of children under two years have not received the Penta3 vaccine, 15% of those under five years have not been vaccinated against measles and 12% have not been vaccinated against polio; 26% of children aged 6–11 years are not attending mandatory education.

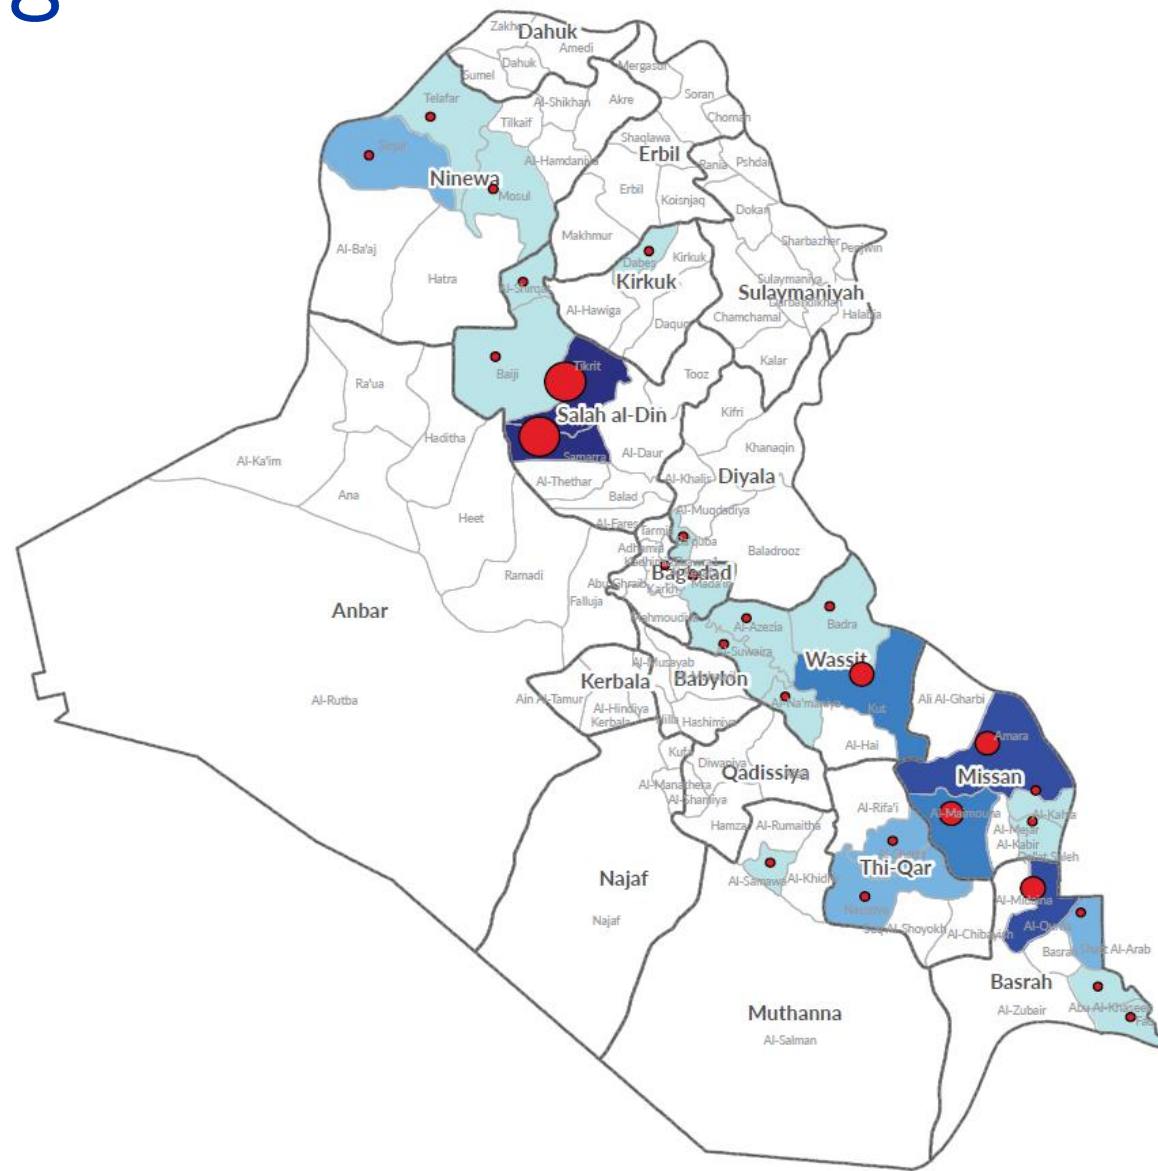

### PRESENCE OF IN-CAMP IDPs

# Emergency Tracking

# Emergency Tracking

- Activated on an ad hoc basis, the DTM Emergency Tracking provides early field reports at the beginning of a complex crisis, allowing IOM to gather, consolidate and disseminate baseline information on displacement and return figures at the onset of a newly emerging crisis
- Data is collected through RARTs and key informant interviews together with qualitative information
- Currently, DTM collect information about population flow from Syria, camp closure, flooding and drought crises

**DISPLACEMENTS DUE TO FLOODS - JULY 2019**

# Emergency Tracking

- Due to the latest crisis in Syria, DTM Iraq launched an emergency tracking tool on 14 October to monitor population fleeing the conflict and crossing into Iraq. The information presented here is collected by IOM at the relevant border points and covers all the displaced population
- Due to the latest crisis in Syria, DTM Iraq launched an emergency tracking tool on 14 October to monitor population fleeing the conflict and crossing into Iraq
- The information is collected by IOM at the relevant border points and covers all the individuals having crossed the border from Syria
- DTM is sharing daily and weekly updates

### DISPLACEMENT MOVEMENTS FROM SYRIA DAILY UPDATE: 6 November 2019

**CONTEXT**  
Due to the latest crisis in Syria, DTM Iraq launched an emergency tracking tool on 14 October to monitor population fleeing the conflict and crossing into Iraq. The information presented here is collected by IOM at the relevant border points and covers all the displaced population.

**SINCE OCTOBER**  
**TOTAL BORDER CROSSINGS: 14,369**

**6 NOVEMBER DAILY**  
163 individuals have crossed through the informal point nearby of individuals having crossed nearby Sahela and Alwaleed villages  
All arrivals for today were transported to Bardarash Camp by

**DAILY BORDER CROSSINGS: 163**

**CAMP OF ARRIVAL: Bardarash Camp**

**ENTRY POINTS USED: Sahela**

**AGE AND GENDER DISTRIBUTION**

Male	57%
Female	43%

Under 18 y.o.	46%
18 y.o. and over	54%

**METHODOLOGY**  
The DTM has teams monitoring the following border points on a daily basis: Fishkhabour and Ibrahim Al Khalil in Dahuk, Al-Fao and Rabia in Nineva, and nearby Sahela and Alwaleed villages in Nineva. As part of their regular border monitoring they collected information about regular border crossings, but these are not covered in this special tracking report. Only individuals fleeing the conflict in Syria will be reported here. This information is collected by IOM staff specifically posted at the relevant border points to meet with the displaced population. The data on age, gender and location of origin is gathered from heads of households during registration and is representative of all arrivals on the specified date.

© 2019 International Organization for Migration (IOM) The information in this report is the result of data collected by IOM field teams and complements information provided by governmental and other entities in Iraq. IOM Iraq endeavors to keep this information as up to date and accurate as possible, but makes no claim—expressed or implied—on the completeness, accuracy and suitability of the information provided through this report. Names and boundaries on DTM information products do not imply official endorsement or acceptance by IOM.

### DISPLACEMENT MOVEMENTS FROM SYRIA WEEKLY UPDATE #2: 31 October – 6 November 2019

**HIGHLIGHTS**  
46% of the individuals are under the age of 18. 16% of them are unaccompanied. 56% are adults accompanied by children. Of these, 42% are travelling with three or more children. 28% of adults are travelling without families, and of these, 88% are males.

**Current Camp population as of 6 November**

<b>Bardarash camp</b> 2,614 households consisting of 11,067 individuals	<b>Gawilan camp</b> 397 households consisting of 1,641 individuals as well as 291 single individuals	<b>Domiz camp</b> 2 households consisting of 13 individuals
--	---	--

**AGE AND GENDER DISTRIBUTION**

0-5 years	18%
6-17 years	25%
18-60 years	28%
Over 60 years	1%

Gender distribution: Male 53%, Female 50%

**NEW CAMP ARRIVALS**  
684 to Bardarash camp  
937 to Gawilan camp

### DISPLACEMENT MOVEMENTS FROM SYRIA WEEKLY UPDATE #2: 31 October – 6 November 2019

**TOTAL CAMP ARRIVALS**  
12,306 to Bardarash camp  
182 to Domiz camp  
1,881 to Gawilan camp

**NEW CAMP ARRIVALS**  
684 to Bardarash camp  
937 to Gawilan camp

**GOVERNORATE ARRIVALS**

Al-Mulayyiyah Center	3%
Al-Mulayyiyah	5%

# REMAP: Flow Monitoring

# Flow monitoring: Methodology

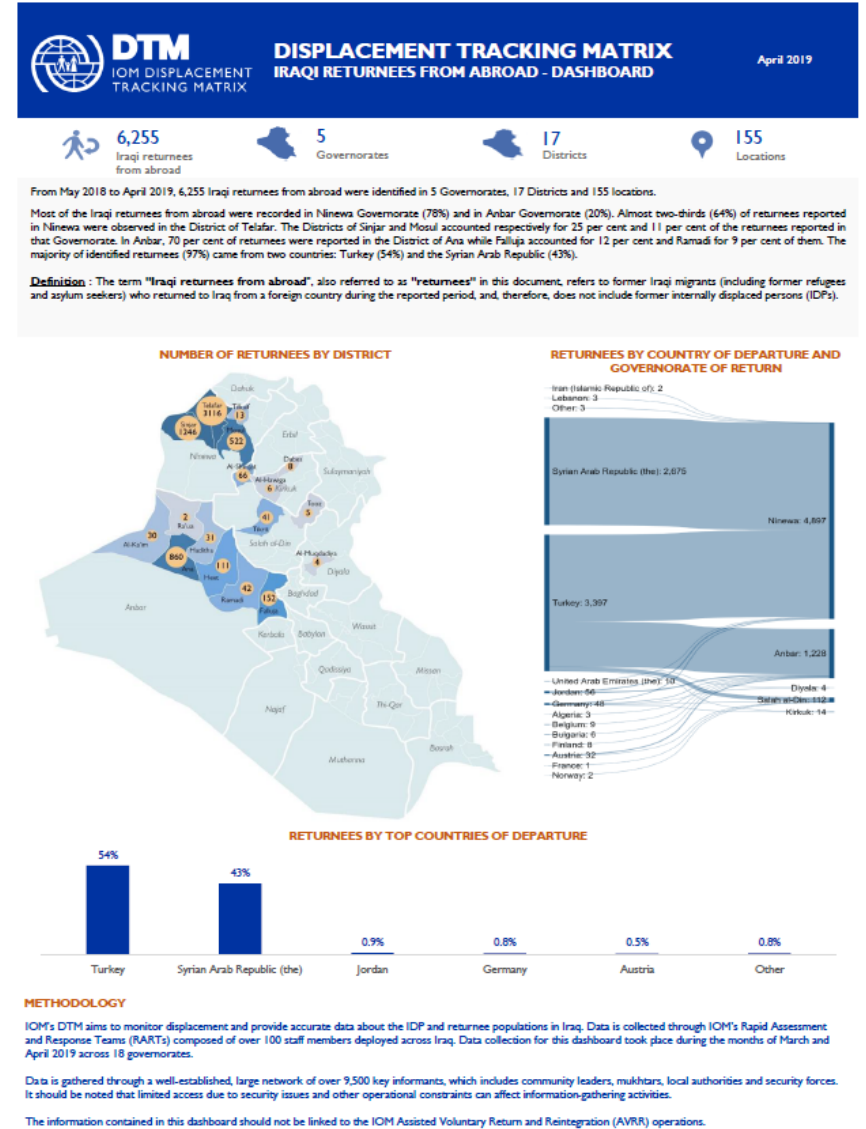

Title of the project: Regional Evidence for Migration Analysis and Policy (REMAP) – Asia and the Middle East

Objectives: Strengthened evidence-based formulation and implementation of humanitarian and development policy and programming on migration and forced displacement in Afghanistan, Bangladesh, Iran, Iraq, and Pakistan.

Target groups:

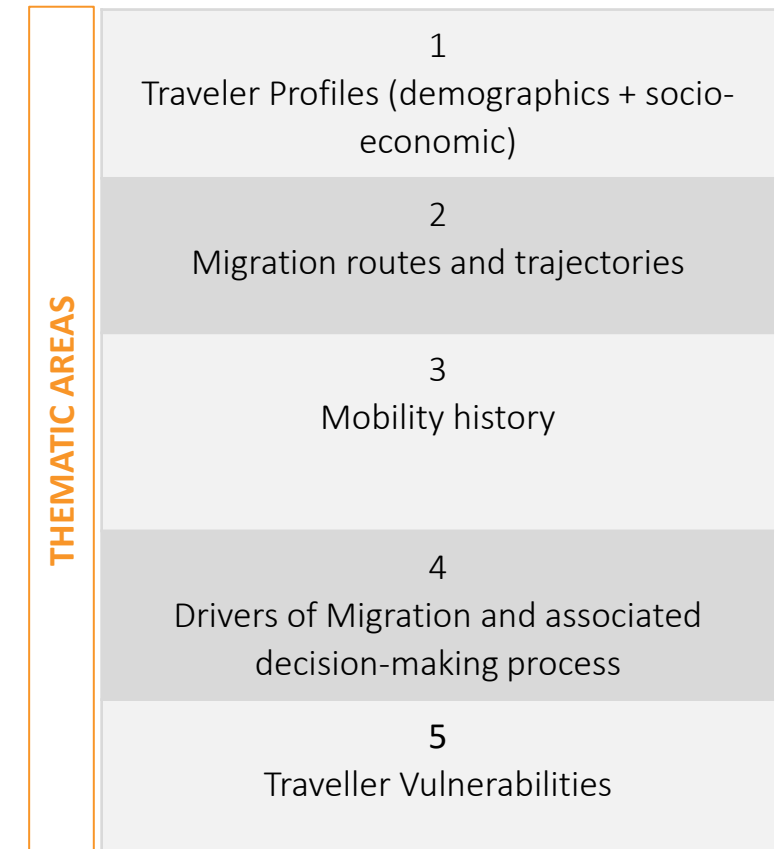

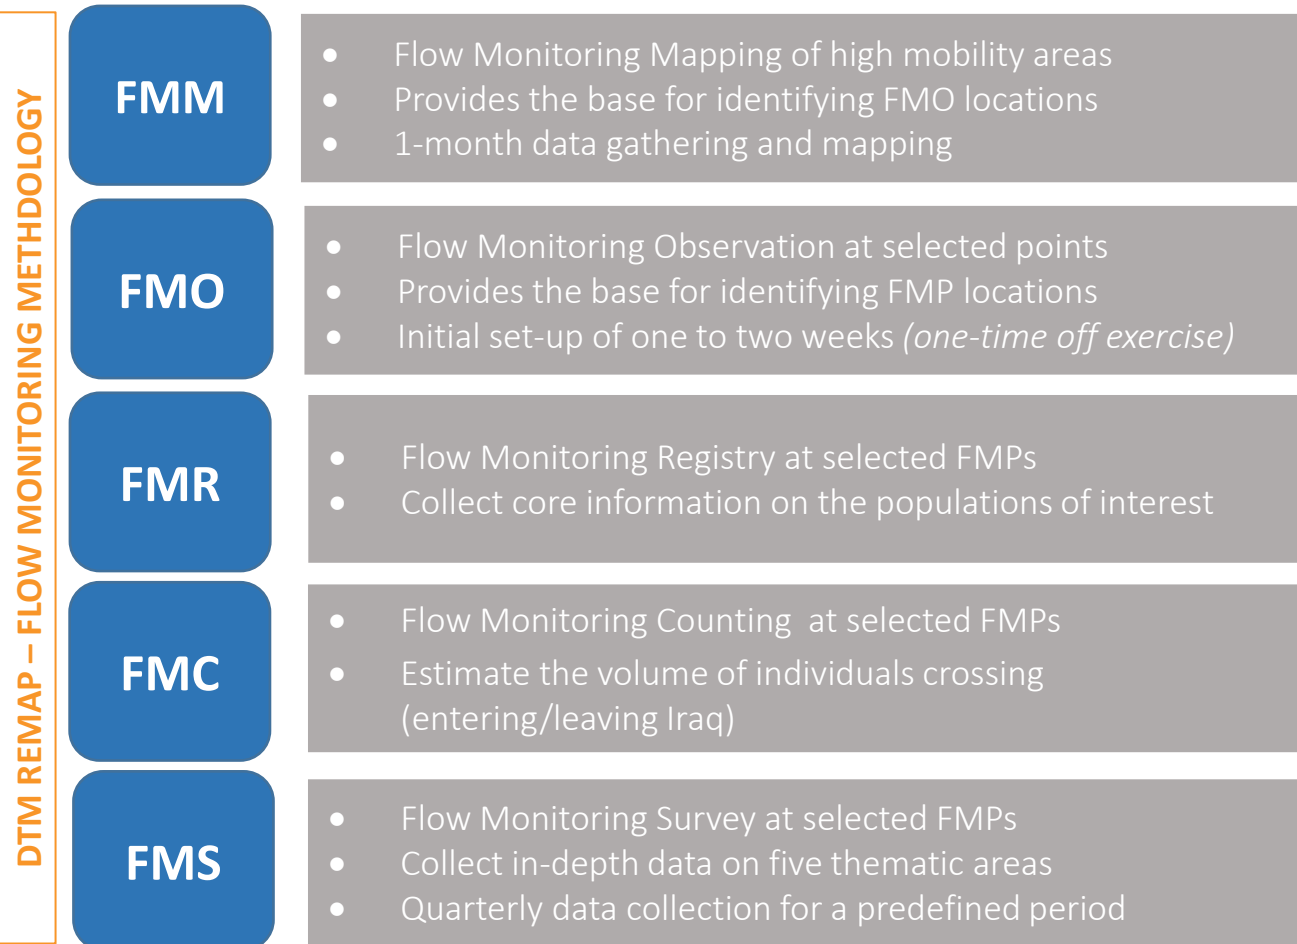

- 1) travelers (Iraqis and non-Iraqis) who enter Iraq after being abroad (incoming flow);
- 2) travelers (Iraqis and non-Iraqis) who exit Iraq (outgoing flow).

7 flow monitoring points: with Iran, Syria and Turkey

# Flow monitoring (FM) - Iraq

Setup and implement flow monitoring exercise around relevant border crossings with neighbouring countries such as Iran, Syria and Turkey to map and identify mobility patterns and profiles of (irregular) migrants that enter and exit Iraq.

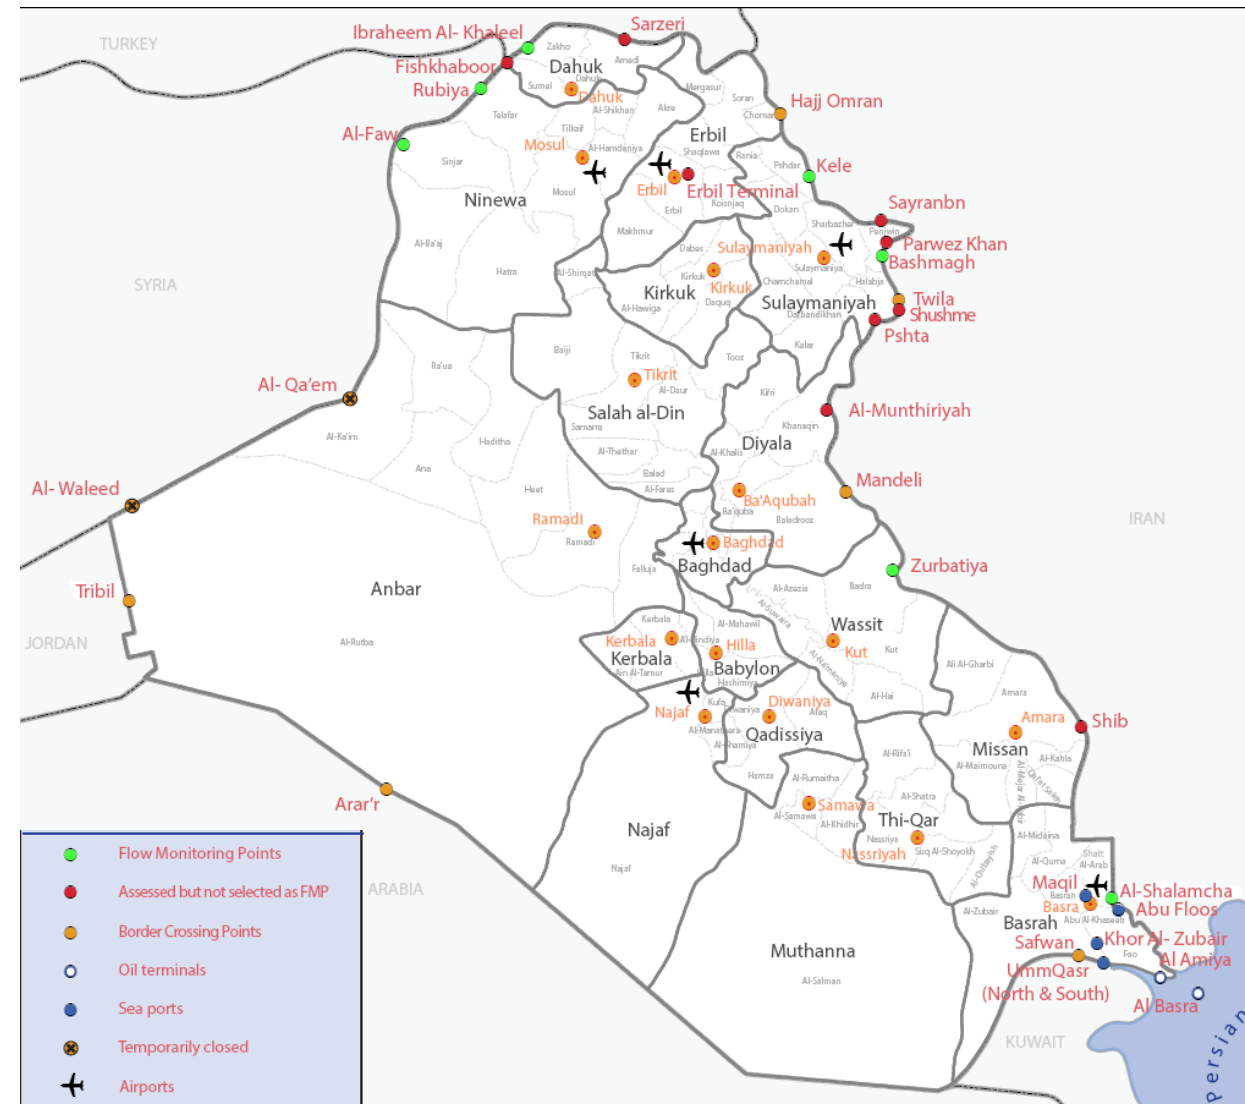

# Flow Monitoring Mapping and Observation

The aim of the FMM and FMO phases was to get a better understanding of migration flows and identify areas of high mobility. This exercise provided the basis for identifying FMP locations.

FMO activities were carried out from 26 May to 2 June 2019 in the following governorates: Dahuk, Erbil, Ninewa, Suly, Diyala, Wassit, Missan, and Basrah.

Out of 16 locations assessed, 7 were selected to be ideal locations for subsequent flow monitoring activities according to the following five criteria:

- **Border countries:** The project intends to target at least one location with flows leading to each of 3 border countries: Iran, Turkey, and Syria.
- **Daily volume of crossings:** Locations with high volume of daily crossings were preferred.
- **Diversity of locations:** The project aims to cover a diversity of locations across the target countries.
- **Accessibility:** The project takes into account the ability of staff to reach and operate from the location for daily data collection.
- **Type of location:** Emphasis was put on selecting different types of locations (official border posts, unofficial border posts, bus stations/terminals).

# Flow Monitoring Registry

After the identification of high mobility areas through FMM and the selection of observation points under the FMO exercise, five Flow Monitoring Points (FMPs) were selected to carry out the DTM's Flow Monitoring Registry (FMR) activities.

These points are: Wassit Terminal in Wassit, Al-Shalamanjah in Basrah, and Ibrahim Al-Khalil in Dahuk, Rubiya and Al-Faw in Ninewa.

Data is collected through IOM's Data Collection team, composed of 14 staff members deployed across the five points.

Data is collected through **direct observation** and **interviews** with individuals crossing the border (both incoming and outgoing) and provides an insight into mobility trends, migration drivers and traveler profiles, including their nationality, sex, age and vulnerabilities.

# Flow Monitoring Counting

To estimate the volume of individuals crossing (entering/leaving Iraq).

The population of interest:

- 1) travellers (Iraqis and non-Iraqis) who enter Iraq after being abroad (incoming flow);
- 2) travellers (Iraqis and non-Iraqis) who exit Iraq (outgoing flow).

To record the time of the crossing (day, hour, minutes), the type of flow (incoming/outgoing), the number of vehicles, the number of travelers by means of transport.

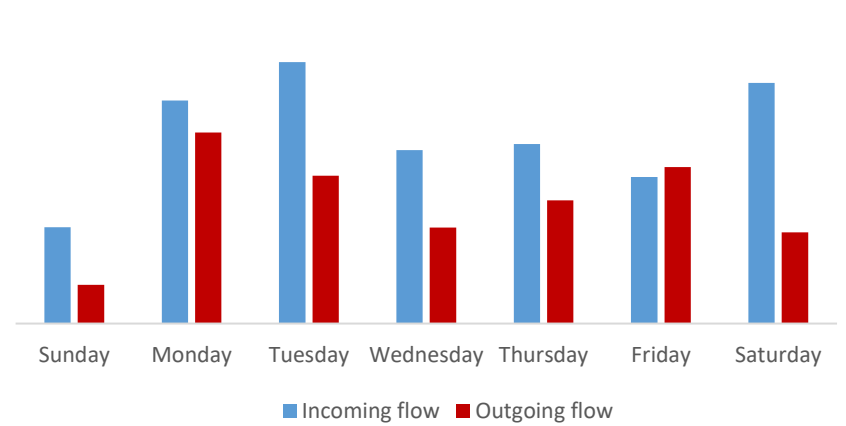

Duration: 15 days over the course of 3 weeks, 5 days per week from 8:30 am to 5:00 pm. The simple counting will be run four times during the year to check and/or adjust the sampling design to seasonal and other types of variations in flow.

Week	Day	Time	Type of flow	Mode of crossing	Enumerators
Week 1	Sunday	8:30 am to 5:00 pm	Incoming	By foot/Private car/Taxi	Enumerator A
				By bus	Enumerator B
	Monday	8:30 am to 5:00 pm	Outgoing	By foot/Private car/Taxi	Enumerator B
				By bus	Enumerator A
	Tuesday	8:30 am to 5:00 pm	Incoming	By foot/Private car/Taxi	Enumerator A
				By bus	Enumerator B
	Wednesday	8:30 am to 5:00 pm	Outgoing	By foot/Private car/Taxi	Enumerator B
				By bus	Enumerator A
Saturday	8:30 am to 5:00 pm	Incoming	By foot/Private car/Taxi	Enumerator A	
			By bus	Enumerator B	

FMP name:	Enumerator name:	Date: (dd/mm/yyyy) ___/___/2019

<input type="radio"/> Minibus (up to 15 seats)		
<input type="radio"/> Other: _____		

Comments: (mean of transport, # of vehicles and # of people)

# Flow Monitoring Survey

**Purpose:** to collect demographic information on the populations of interest, information on travel routes, mobility history, reasons for travel and other information if necessary.

## The population of interest:

- 1) travellers (Iraqis and non-Iraqis) who enter Iraq after being abroad three months or more (incoming flow);
- 2) travellers (Iraqis and non-Iraqis) who exit Iraq planning to be away for three months or more (outgoing flow).

**Duration:** three months for one round.

## Thematic areas of FMS form

- ✓ Traveler Profile (demographics + socio-economic)
- ✓ Mobility Profile (routes and trajectories)
- ✓ Mobility history
- ✓ Reasons for travel
- ✓ Travel Arrangement
- ✓ Vulnerabilities

All travellers aged 18 years old and over are eligible for interviewing about core information, regardless of their nationality.

Travellers are selected randomly through the adoption of a 'systematic step/interval' – i.e. travellers are systematically selected at fixed intervals from the start of the workday.

The step/interval for week 1 is fixed at 1:5 (one every five individuals is selected for an interview) and will be reviewed after week 1 to take into account the volume of flow.
